

The BCC and Long Case

Endean Tan

MBBS Masterclass Series

16 June 2014

10 minutes = (2 to read) + 8 encounter + 2 discussion

THE BRIEF CLINICAL CONSULT (FOCUSED H_x/PE_x)

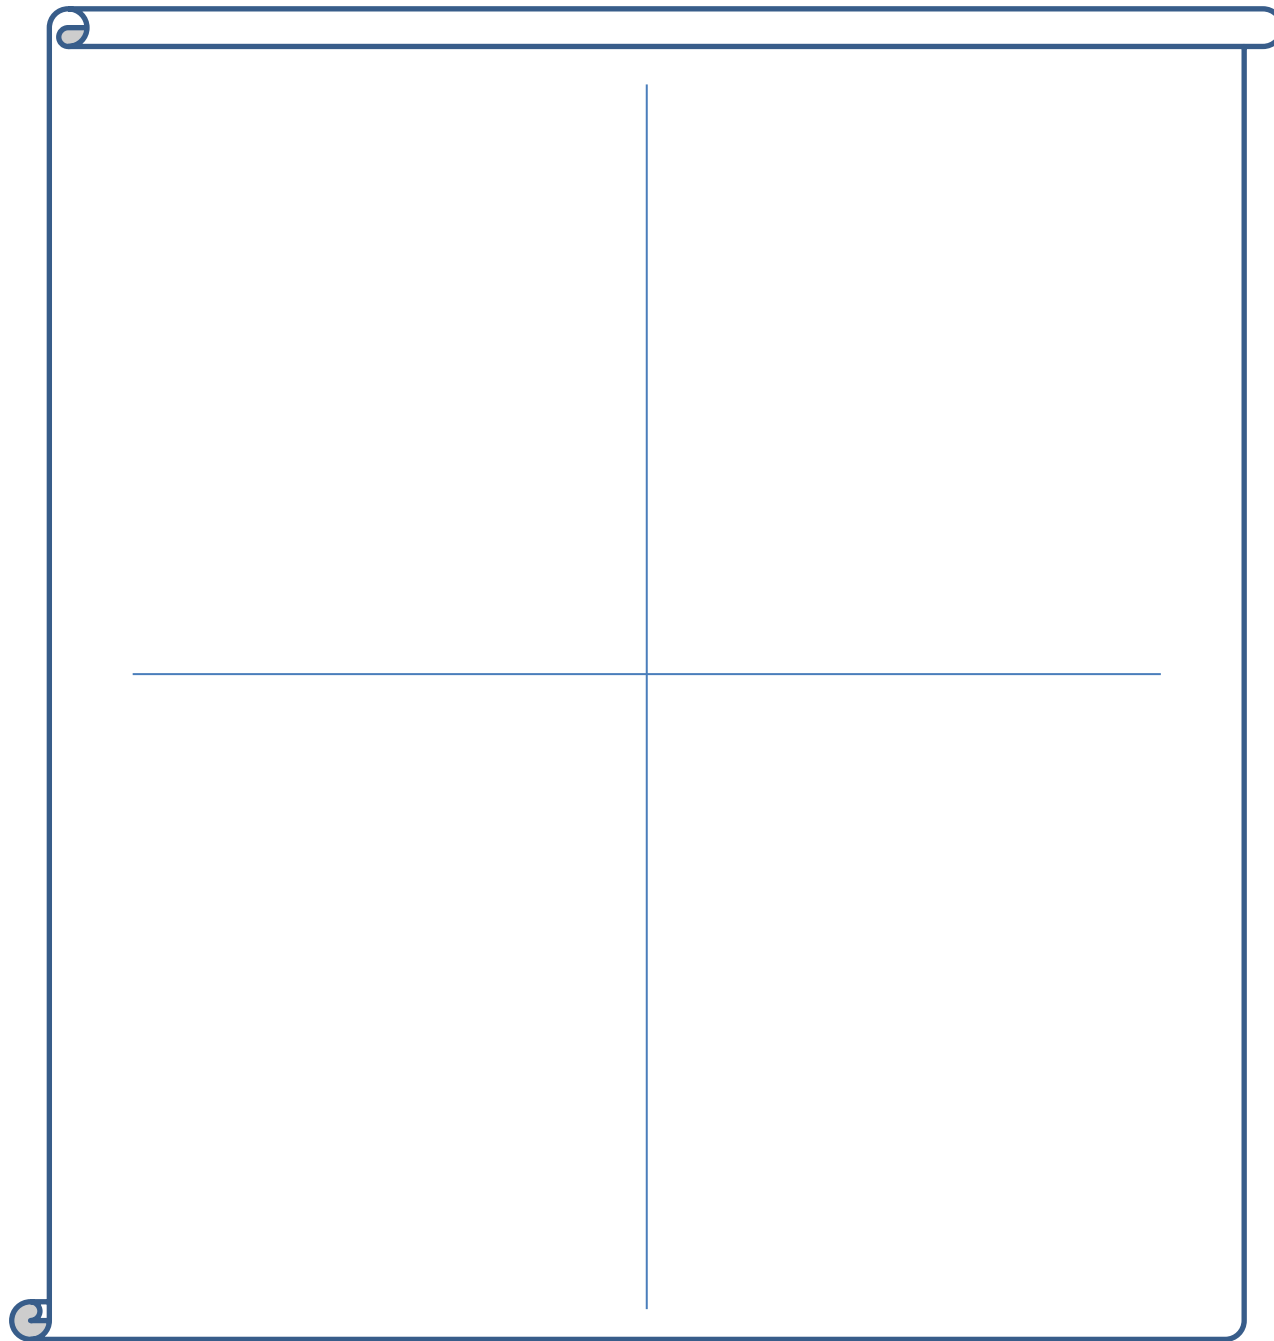

Planning

Segment Time

- Read: 15s
- Differentials (+ H_x) : 45s
- PE_x plan: 15s
- Concerns: 15s
- Consolidate: remainder

Cumulative Time

- 00:15
- 01:00
- 01:15
- 01:30
- 02:00

Encounter

Segment Time

- Greet: 10s
- Ask: 1min 50s
- Examine and ask: 4min
- Summary, concerns: 2min
- Examiner time: 2min

Cumulative Time

- 00:10
- 02:00
- 06:00
- 08:00
- 10:00

37 minutes = (5 to read) + 25 H_x/PE_x + 2 reflection + 10 discussion

THE LONG CASE (CASE ANALYSIS)

Approach

Issues: use the schema

- Medical
- Functional
- Social

Investigative/Mx Plan

- Confirm diagnosis
- Evaluate complications
- Treatment
- Counselling

Case scenarios

- Anaemia:

- V : BGIT, bleeding PV (anti-coagulated state)
- I : Infective endocarditis, HIV/AIDS, TB
- T : N/A (in Medicine)
- A : So many... in fact, all of them; including factor inhibition
- M : Hypothyroidism, B12/folate deficiency (aetiology?)
- I : N/A
- N : Self-evident
- D : Really a lot here too... Beware traditional medicine.
- C : Thalassaemia, hereditary spherocytosis
